

THE VISIBILITY CODES

VISIBILITY ACTION PLAN

Recognition Edition

Turn your result into
one clear next move.

KATRINA KAVVALOS

Your result is Recognition.

Your assessment suggests that your biggest gap right now is recognition. This means the right people may not yet clearly understand, remember or trust the value you already bring. You may be visible, experienced and capable, but if your distinctive value and proof are not easy to see, you can still be overlooked.

This Action Plan is designed to help you move from overlooked to recognised.

By the end of this Action Plan, you will:

1.

Decide what you want the right people to remember.

2.

Identify your Distinctive Authority and Magnetic Advantage.

3.

Use ChatGPT to audit your recognition, credibility and visible proof.

4.

Create one clear recognition activation plan.

IMPORTANT

Recognition does not mean you lack value. It means your value may not yet be clear, memorable and supported by visible evidence.

Use AI as a recognition strategist.

When you are close to your own work, it can be difficult to see what is distinctive, what people already value, and what proof is missing from your public presence. To make this easier, I have included an AI ChatGPT prompt. It will ask you one question at a time, help you identify your strongest recognition position and turn it into a practical visibility strategy.

How to use it

- ◇ Replace [AREA] with the area in which you want stronger recognition, for example business, career, personal brand, speaking, creative work or leadership.
- ◇ Copy and paste both prompt sections into ChatGPT as one continuous prompt.
- ◇ ChatGPT will ask one question at a time. Answer honestly and include specific examples whenever possible.
- ◇ Correct anything AI misunderstands about your experience, strengths, audience or results.
- ◇ Do not accept a position simply because it sounds impressive. Choose one that is true, memorable and supported by evidence.
- ◇ Keep refining until your recognition position feels clear, credible and energising.
- ◇ Save the final one page summary and use it to complete the worksheets in this Action Plan.

Useful replies if the conversation feels too broad or generic

- ◇ "That feels too generic. Ask me questions that uncover what is difficult to compare."
- ◇ "What proof supports that claim?"
- ◇ "What would a decision maker need to see before trusting me?"
- ◇ "Give me a sharper, more memorable version without exaggerating."

AI recognition prompt

Copy and paste both coloured sections into ChatGPT as one continuous prompt. Before you press Enter, replace [AREA] with the area in which you want stronger recognition.

SECTION 1 OF 2, COPY THIS INTO CHATGPT

Act as my strategic recognition and distinctive authority coach. Help me identify how I should be recognised in [AREA], what makes me memorable and credible, and what visible proof I need to make that recognition clear to the right people.

Begin by asking which area I want stronger recognition in, which opportunity I want that recognition to create, and who needs to recognise me.

Ask me one thoughtful question at a time. Wait for my answer before asking the next question. Use each answer to ask sharper follow up questions. Challenge vague, broad, exaggerated or generic answers. Do not let me hide behind job titles or words such as passionate, authentic, expert or unique without evidence.

Do not invent achievements, qualifications, testimonials, audience data, market demand or proof. Use only what I tell you. Keep asking until you understand my expertise, experience, personality, perspective, evidence, audience and desired opportunity, and I confirm that your summary feels accurate.

Explore these areas:

1. What I want the right people to remember me for.
2. The opportunity I want stronger recognition to create.
3. The people, audiences and decision makers who need to recognise me.
4. My expertise, skills, experience, results and most relevant stories.
5. The questions, compliments, requests and feedback I receive repeatedly.
6. My personality, energy, communication style and distinctive perspective.
7. Complementary skills or cross industry experience that make me harder to compare.
8. My existing proof, including photographs, video, testimonials, results, audience data, media, awards, published work, partnerships and repeat invitations.
9. What my current public profile communicates within the first five seconds.
10. Which claims are unclear, unsupported or hidden.
11. What I no longer want to be known for.
12. One idea, message, method or theme I could repeat consistently.

When you have enough information, give me a concise summary of what you have heard and ask me to correct anything that is inaccurate.

AI recognition prompt, continued

Continue copying from the previous page. Paste both sections together into ChatGPT before pressing Enter.

SECTION 2 OF 2, CONTINUE COPYING

After I confirm the summary, give me three possible recognition positions. For each position, explain what people would remember, why it fits, the audience and decision makers it serves, the opportunities it could create, the proof I already have, the proof I need to make visible, the main risk and one signature asset or content idea.

Then recommend the recognition position that appears strongest, and explain your reasoning clearly.

Create the following for the recommended recognition position:

1. My Recognition Statement.
2. My Distinctive Authority Statement.
3. My Magnetic Advantage Summary.
4. My five strongest evidence assets.
5. The evidence gaps I need to fill and how to fill them.
6. A one sentence public profile statement.
7. Three credibility content ideas.
8. One signature proof asset to create.
9. One public profile change to make.
10. One specific practical action I can take next.

End by asking what feels accurate, what feels wrong and what still feels unclear. Continue refining the recognition position with me until I say, **THIS IS HOW I WANT TO BE RECOGNISED**.

When I say **FINALISE MY RECOGNITION STRATEGY**, give me a clean one page summary of the final position and my next three actions.

Do not press Enter until both sections have been pasted together.

Your recognition strategy

Use what you uncovered through reflection and AI conversation to define what the right people should remember, why they should believe it and what proof needs to become visible.

3. WHAT VISIBLE EVIDENCE ALREADY SUPPORTS THIS?
